

Little Dreamer

by *Moonlight Slumber*

Safe, healthy, affordable

The best in its class for your child's comfort and safety

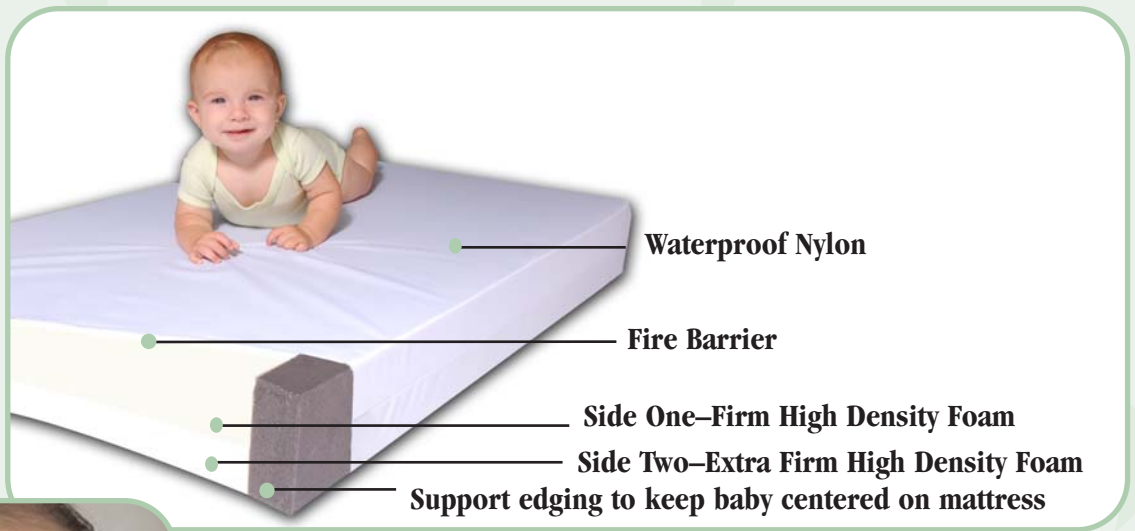

SAFE. Industry and Federal standards for crib mattresses are surprisingly lax. However, the safety of little dreamers everywhere is the primary goal of Moonlight Slumber®. That is why our mattresses exceed all current and planned safety standards. Each Little Dreamer® mattress comes standard with an internal fire resistant barrier—exceeding the Federal Flammability Standard of FR, fire retardant. Free of chemical treatment, we offer unparalleled safety and peace of mind for the most discerning parents.

HEALTHY. Developed from a line of proven health care mattresses used in hospitals and nurseries nationwide, Little Dreamer® mattresses offer unique health features.

- **Antimicrobial.** Each Little Dreamer® mattress is antimicrobial—treated inside and out to safely and effectively prevent bacteria growth for the lifetime of your mattress.
- **No taped edges.** The decorative tape, or roll, that is standard of typical mattress seams actually prevents fluid run-off by absorbing excess body fluids. The damp cording then becomes host to bacteria. Little Dreamer® mattresses eliminate taped edges and, therefore, eliminate the unintended parasopic guests.
- **Dropped side seams.** Instead of designing mattresses with seams on the top of the sleep surface, allowing excess fluids to sit on needle holes, Little Dreamer® mattresses have dropped the seams to the sides to prevent fluid build up and bypass possible seepage.

COMFORTABLE. Little Dreamer® mattresses are available in a dense, high quality, medical grade all-foam model. Offering extra firm support for your child on one side and firm support for your toddler on the other, the Little Dreamer is engineered within SIDS reduction guidelines, designed with pressure-reduction techniques that come from years of experience in hospitals and health-care facilities.

BETTER. From the first look, you will know that Little Dreamer® mattresses are different.

- **Squared Shape.** Instead of fitting a rounded mattress into a square crib, Little Dreamer® mattresses have squared corners and edges to promote the tightest possible fit in the crib, making Little Dreamer® mattresses the safest in their class. What's more, Custom sizes are available.

- **Quality ticking.** Standard vinyl mattress covers leave much to be desired. They do not breathe, they are noisy, they chip as they age, and they are unattractive. By contrast, Little Dreamer® ticking is made of quality, durable, waterproof nylon. Soft to the touch and enhanced only with a subtle white-on-white herringbone pattern, our covers warm under baby, are flame retardant, PVC free and offer a standard of quality you have to feel to believe.

The simple shape, clean lines, and quality ticking stands apart from all other mattress brands. The smooth surface and 5" thick design pulls sheet taut and makes a crisp, beautiful bed. When a Little Dreamer® mattress is used, all your bedding takes on a more elegant appearance. Call Moonlight Slumber today to learn more about Little Dreamer® crib mattresses.

UNPARALLELED SAFETY.

Little Dreamer® mattresses are safe, healthy, affordable mattresses for little dreamers and their parents.
